WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 4, 2022

## Severe Weather Outlook

- Two separate rounds of severe weather, including the threat of tornadoes, will erupt and put tens of millions at risk across the Plains and Mississippi Valley this weekend.
- AccuWeather forecasters expect some of the strongest and most damaging storms to develop after dark, which will add to the danger.
- One key ingredient that is needed to fuel severe thunderstorms and tornadoes is moist air from the Gulf of Mexico, and that may not be in place until Saturday evening over portions of the central Plains.
- The risk of severe thunderstorms on Saturday afternoon will begin to ramp up from eastern Nebraska to northeastern Kansas but will likely reach its peak across Iowa and northern and central Missouri early Saturday evening. Major cities at risk for severe thunderstorms, including an isolated tornado, on Saturday include Kansas City, Missouri; Des Moines, Iowa; and Omaha, Nebraska.
- Due to the strengthening nature of the storm system, there is the potential for heavy, gusty thunderstorms to last well into the nighttime hours as they advance through portions of Illinois, Wisconsin, Indiana, southeastern Minnesota and Michigan.
- As the first storm shifts across Canada on Sunday, the second storm will advance across the southern Plains.
- "All facets of severe weather are possible with the setup on Sunday, ranging from damaging wind gusts and isolated tornadoes to large hail and flooding downpours," AccuWeather Senior Meteorologist Tony Zartman said.
- The majority of storms are likely to wait until late Sunday or Sunday evening to erupt, but severe weather hazards may continue well into Sunday night over portions of the southern Plains and the lower Mississippi Valley.
- Because of the risk of severe thunderstorms, including a few isolated tornadoes, after dark, the eruption could still pose a considerable danger.
- Cities at risk for the Sunday severe weather threat include Dallas; Oklahoma City; Shreveport, Louisiana; Little Rock, Arkansas; and Memphis, Tennessee.
