WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 27, 2022

## Tropical Outlook

### Central Central Atlantic Disturbance 1

- A tropical wave located about 900 miles east-southeast of the southern Windward Islands is producing a large area of showers and thunderstorms.
- Environmental conditions appear conducive for further development, and a tropical depression is likely to form during the next couple of days before the system reaches the Windward Islands Tuesday night or possibly while moving westward across the southern Caribbean Sea Wednesday through Friday.
- A NOAA Hurricane Hunter aircraft is scheduled to investigate the system this afternoon.
- Formation chance through 48 hours...high...70 percent.
- Formation chance through 5 days...high...90 percent.

### Northern Gulf of Mexico Disturbance 2

- Disorganized showers and thunderstorms over the north-central Gulf of Mexico are associated with a trough of low pressure. Development of this system is expected to be slow to occur while it moves west-southwestward at about 10 mph toward the northwestern Gulf of Mexico and approaches the coasts of southern Texas and northeastern Mexico during the next few days.
- Formation chance through 48 hours...low...10 percent.
- Formation chance through 5 days...low...20 percent.

### Eastern Tropical Atlantic Disturbance 3

- A tropical wave located several hundred miles southwest of the Cabo Verde Islands is producing disorganized showers and thunderstorms. Environmental conditions could become conducive for gradual development later this week while the system moves west-northwestward at around 15 mph over the central tropical Atlantic.
- Formation chance through 48 hours...low...near 0 percent.
- Formation chance through 5 days...low...20 percent.
