WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 7, 2023

Wildfire Smoke/Air Quality Alerts

- Thick wildfire smoke from Canada is putting millions of Americans under an air quality alert and leaving apocalyptic-like scenes across major cities in the Northeast.
- A haze blankets New York City, Philadelphia, and Washington, D.C., as the acrid wildfire smoke from multiple blazes burns and invades the northern skies.
- When the Air Quality Index (AQI) reaches a value of 100 or greater, the air quality is considered unhealthy. Several communities reached levels in the 200-300 range on Tuesday and New York City experienced readings over 200 during the late evening.
- Philadelphia was back over 200 Wednesday morning – air quality levels considered "very unhealthy" – while New York City and Washington remained in the unhealthy range.
- New York Governor Kathy Hochul issued an Air Quality Health Advisory on Tuesday for Long Island, New York City Metro, Lower Hudson Valley, Upper Hudson Valley, Adirondacks, Eastern Lake Ontario and Central New York regions.
- The FOX Forecast Center said a slow-moving low-pressure system centered over the coastal region of New England is helping to bring in a northwesterly flow, ushering in smoke-filled skies from dozens of wildfires burning in Canada, and the smoke is expected to stick around for at least a few more days.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
