WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 16, 2023

Severe Weather Outlook

- Deadly severe weather outbreak continues threatening nearly 10 million Americans.
- A widespread severe weather threat that has brought deadly tornadoes to the Plains, blistering winds to the Southeast and flash flooding into Florida's Panhandle Thursday is revving up for another day in many of the same areas still cleaning up from earlier rounds of storms.
- There are two areas of concern in the Midwest and Southeast. In the Southeast, NOAA's Storm Prediction Center has issued a level 2 of 5 risk of severe weather stretching from Arkansas through much of Mississippi and into southern Alabama and, again, the Florida Panhandle.
- Already a strong line of thunderstorms left over from Thursday's activity is moving across Mississippi early Friday morning, bringing ferocious wind gusts up to 80 mph along with heavy rain and frequent lightning, along with a few tornadoes. Jackson, Mississippi reported a gust of 62 mph when the squall line pushed through Friday morning.
- This line of storms will move into southern Mississippi and Alabama, later reaching the Florida Panhandle later Friday morning.
- Severe Thunderstorm Watches are in effect until the late morning for portions of the Gulf Coast.
- Supercell thunderstorms are expected to refire across the Southeastern threat zone Friday afternoon and evening as atmospheric instability returns, but with damaging wind gusts and large hail are the primary severe weather threats.

Severe Weather Activity

- A second night of severe storms across the South and the southern Plains led to deadly tornados and destructive winds for more than a dozen states and left over 500,000 people without power.
- A destructive tornado ripped through Perryton, Texas, Thursday evening, killing at least three people and injuring 56 others, according to the Ochiltree County Sheriff's Office.
- Perryton Fire Chief Paul Dutcher said the number of injured may be around 100 people.
- Media reports as many as 200 homes may be destroyed.

DAILY DART

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

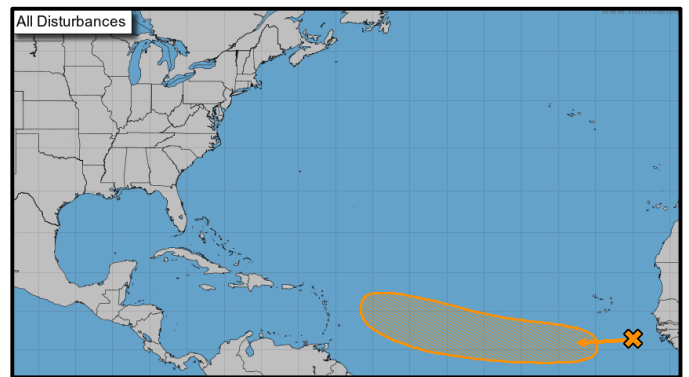

June 16, 2023

- The National Weather Service in Amarillo told FOX Weather that the tornado was on the ground for approximately 8 miles before lifting.
- Gov. Greg Abbott directed the Texas Division of Emergency Management to deploy state emergency response resources to meet urgent life-safety needs in Perryton.
- There have been seven reported tornadoes in Texas, Oklahoma, and Michigan as of Thursday evening.

Tropical Activity

Atlantic – Disturbance 1

- Located near the west coast of Africa moving W at 15-20 mph.
- Tropical depression could form during the early to middle portions of next week.
- Formation chance - 48 hours: Low (near 0%); 7-day: Medium (50%)
