WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 15, 2023

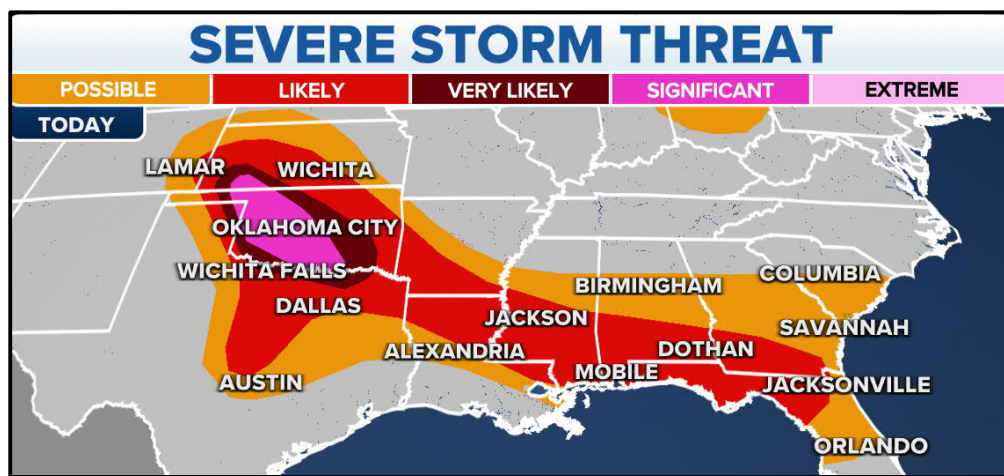

## Severe Weather Activity

- Severe weather impacted the Lower Mississippi Valley and Southeast overnight. Preliminary reports of 10 tornado touchdowns (3 in AL, 2 in TX, 5 in GA), 215 wind, and 99 hail reports.
- There were several injuries and some damaged structures, downed trees and power lines, but no significant damage, impacts to critical infrastructure, or fatalities reported.
- Over 111K customers without power across Texas, Mississippi, Alabama, Florida and Georgia.

## Severe Weather Outlook

- Nearly 20 million people from western Oklahoma and Kansas through the South and into the Florida Panhandle are once again threatened by damaging wind gusts, hailstones larger than 2-3 inches, and tornadoes.
- The Plains have the greatest threat of dangerous weather Thursday, with NOAA's Storm Prediction Center issuing a Level 4 out of 5 severe weather risk across much of western Oklahoma into southwestern Kansas.
- Severe storms will begin firing early Thursday afternoon, with storms increasing in coverage and intensity throughout the afternoon and evening.
- Supercell thunderstorms will bring threats of tornadoes and hailstones of 3 inches or larger, while clusters of thunderstorms may again bring the risk of a derecho in the afternoon or evening with gusts of 80 mph. This line will likely move into the Ark-La-Tex region by evening, and into the lower Mississippi Valley Thursday night.
