WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 17, 2021

Severe Storms

Missouri

- The state is seeking help from the federal government to conduct damage assessments from last week's deadly tornadoes in preparation for an official request for disaster assistance.
- Gov. Mike Parson urged the Federal Emergency Management Agency (FEMA) to collaborate with local and state partners on Preliminary Damage Assessments (PDAs) in Pemiscot, Reynolds, and Dunklin counties, which were ravaged by last week's storms.
- The assessments will be used for a request for federal assistance. The State Emergency Management Agency (SEMA) has already begun the process in collaboration with community officials, Parson said, while other communities may be included once more information is collected.
- "Last Friday, a series of fast-moving severe storms affected several areas of Missouri, resulting in at least six tornadoes and causing two deaths," Parson said. "SEMA's regional coordinators have helped local emergency managers with documenting extensive damage to public infrastructure, homes, businesses, electric power delivery systems, and emergency response costs in the impacted communities. Initial damage reports show a clear need for a formal review by FEMA as part of the federal disaster declaration process."

Kentucky

- Six additional counties are now eligible for FEMA assistance after the Dec. 10 storms and tornadoes.
- Individuals and households in the following counties can apply for FEMA Individual Assistance, which may include temporary housing assistance, basic home repairs and certain other uninsured disaster-related needs: Christian, Hart, Hickman, Logan, Lyon and Ohio.
- These counties join Caldwell, Fulton, Graves, Hopkins, Marshall, Muhlenberg, Taylor and Warren counties, which were previously approved for Individual Assistance.
