WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 5, 2022

## November Severe Storm Recap

- November saw 432 reports of severe weather, which is well above the long-term average of 330. The busiest day, Nov. 4, saw 148 reports of severe weather. That's the most the nation had seen since Aug. 29.
- Six days saw above-average severe weather activity, with four days (Nov. 4, 5, 29 and 30) doubling the average. On the flip side, 16 days saw zero reports.
- The 107 reports of tornadoes this November ranks as the busiest in a single month since June and is just about twice the long-term average of just over 50 for the month.
- Reports were made in 10 states, with the lion's share (30) going to Texas. The top three for the month are Mississippi with 22 and Arkansas with 19.
- November will be remembered for two separate outbreaks. The first occurred on Nov. 4-5 when 31 tornadoes were confirmed by the National Weather Service survey teams across parts of Texas, Oklahoma, Louisiana, and Arkansas. The strongest tornadoes for the month occurred during this outbreak – a pair of EF-4 tornadoes – and were the strongest in the U.S. since April's EF-4 in Georgia.
- The strongest of these EF-4 tornadoes, which struck near Caviness, TX, was estimated to have winds of 170 mph. Over the next 23 days, there were just three reports of tornadoes, making it the quietest, most tornado-free period of the year since January and February.
- The month's second outbreak began on the 29th and was responsible for 40 reports of tornadoes over two days. So far, 11 tornadoes have been confirmed and rated by the National Weather Service, including a pair of EF-3 tornadoes – one in Louisiana on Nov. 29 and the other crossing from Mississippi into Alabama the next morning.
- Mississippi leads the U.S. this year with 142 reports of tornadoes, but Texas is right behind with 141. Alabama rounds out the top three with 107.

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 5, 2022

## Declaration Request Florida

- On December 2<sup>nd</sup>, the Governor of Florida requested a major disaster declaration for Hurricane Nicole.
- He requested individual assistance for 6 counties (Brevard, Lake, Volusia, Flagler, Putnam and St. Johns).
- Nicole made landfall as a Category 1 hurricane on the east coast of Florida on North Hutchinson Island just south of Vero Beach in the early morning hours of Nov. 10.
- Significant flooding was reported along the St. Johns River in northeast Florida. The bayfront in St. Augustine was completely underwater the morning of Nov. 10.
- As of Nov. 11, the storm caused the deaths of at least five people.

### Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied /Pending	Number of Counties/Tribes
GA	Flooding September 4-14, 2022	10/4/2022	Pending	1 County/4 Cities
CA	Heat Dome and Wildfires Aug 29 & continuing	10/26/2022	Pending	6 Counties
FL	Hurricane Nicole Nov 7 & continuing	12/2/2022	Pending	6 Counties

### WSP USA Inspection Services Active Disasters

Disaster Number and State	Disaster Type	Number of Counties Declared	Days Since Launch	Registration Deadline
