WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

November 17, 2023

Tropical Activity

Atlantic – Potential Tropical Cyclone Twenty-Two

- Located about 200 miles west-southwest of Kingston, Jamaica, and is moving northeast at 10 mph.
- It has maximum sustained winds of 40 mph but lacks a definitive center, which would enable its classification to tropical storm status.
- According to the NHC, Potential Tropical Cyclone Twenty-Two could strengthen into a tropical storm on Friday or Friday night as it makes landfall in Jamaica later Friday.
- From there, the storm will head toward southeastern Cuba by early Saturday, then the southeastern Bahamas and the Turks and Caicos Islands on Saturday.

Severe Weather & Flood Activity

Florida

- This week’s rain event brought a triple threat of torrential rain, hurricane-force winds and a very dangerous ocean.
- Broward took the biggest soaking of the South Florida region. Lauderdale-by-the-Sea received the most rain, at 13.31 inches, according to the National Weather Service Miami.
- Miami-Dade County was hard-hit as well: Biscayne Park got 10.12 inches and Coral Gables and Coconut Grove were both soaked with just over 9 inches of rain.
- There were no reports of permanent damage in Miami-Dade County as of Thursday afternoon, Jennie Lopez, a spokesperson for the county mayor’s office, said in an email. Officials were removing standing water and will complete a full assessment once things have dried up and cleared of debris, she said.
- Wind gusts were near hurricane strength in some areas. Wind speeds at Port Everglades topped out at 75 mph, Government Cut in Miami saw 75 mph and Dania Pier reached 70 mph.
- The storms brought Fort Lauderdale’s annual total rainfall to date to 102 inches — more than any other city in the country, Mayor Dean Trantalis said Thursday afternoon.
- Fort Lauderdale Fire Rescue received 80 calls for service relating to the storms, the mayor said.
- Still, Fort Lauderdale emerged from the storm without any major damage. The water and wind damage city officials assessed Thursday was minor to moderate, the city said in a statement.
- The Melrose Manors, Edgewood, River Oaks, Shady Banks, Durrs, Dorsey Riverbend, Croissant Park, Chula Vista and the Islands were among the neighborhoods most affected by the storms, Fort Lauderdale officials said. Water levels were up to 2 feet in some areas.

48-hour rainfall reports

Lauderdale-By-The-Sea	13.31 inches
Oakland Park	12.92 inches
Wilton Manors	12.47 inches
Ft Lauderdale Exec Airport	12.20 inches
