Severe Weather Outlook

Florida

- Florida is bracing for a rough stretch of weather that might seem like a tropical storm-like system over the weekend.
- The FOX Forecast Center said an unusually strong area of low pressure will develop later Friday night into Saturday over the Gulf of Mexico. As that low gets stronger, winds across Florida will increase, and rain will get heavier, with even a risk of severe weather for the heart of the state.
- Gusty winds were already felt in some parts of Florida Friday as high pressure over the eastern U.S. interacts with the developing low in the Gulf, the FOX Forecast Center said.
- The highest winds will be found over the immediate East Coast, where winds could gust to 40-45 mph with isolated higher gusts. Wind Advisories are posted from Daytona Beach south along the eastern shores into the Miami area.
- As that low becomes mature and moves northeast toward the state, it'll pull in significant moisture off the ocean water to produce widespread rain, the FOX Forecast Center said.
- Some of that rain will be heavy at times on Friday night and early Sunday morning, which could lead to flash flooding. This will be especially true in the urban corridor of South Florida from Ft. Lauderdale to Miami, which already sits tens of inches above average in annual rainfall. Central Florida will also see a risk of flash flooding from Tampa to Orlando.
- The FOX Forecast Center is also looking at the potential for severe weather Saturday evening and overnight. With enough instability developing and strengthening low-level winds, rotating thunderstorms could develop late on Saturday. These storms could produce brief tornadoes, particularly after sunset.
- Coastal Flood Warnings are in effect from the Daytona Beach area south through the Space Coast in Brevard County and through Vero Beach and Port Saint. Lucie.
- Coastal Flood Advisories are in effect from the Palm Coast area northward through St. Augustine, Ponte Verda and Jacksonville. They also extend into Georgia, including the city of Brunswick.
