WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 17, 2023

Tropical Activity

Atlantic – Disturbance 1

- Located 875 miles west-southwest of the Cabo Verde Islands.
- Tropical depression could form during the next several days.
- Formation chance – 48-hour: Medium (40%); 7-day: Medium (60%)

Atlantic – Disturbance 2

- Forecast to move off the coast of Africa early Wednesday.
- Further development possible over the weekend.
- Formation chance – 48-hour: Low (30%); 7-day: Medium (60%)

Atlantic – Disturbance 3

- Could form in the Gulf of Mexico by the beginning of next week.
- Slow development is possible.
- Formation chance – 48-hour: Low (near 0%); 7-day: Low (30%)

Eastern Pacific – Hurricane Hilary (CAT 1)

- Hurricane Hilary is located about 320 miles to the southwest of Manzanillo, Mexico and about 560 miles to the south-southeast of Cabo San Lucas, Mexico, and is moving to the west-northwest at 13 mph with maximum sustained winds of 75 mph.
- Hilary rapidly intensified into a hurricane on Thursday morning after developing into a tropical storm on Wednesday, and forecasters say that the hurricane's path could bring "significant" impacts to Southern California and the Southwest by the end of the week and into the first part of next week.
- Ocean water off the coast of California is cool, so winds should diminish the intensity of Hurricane Hilary if the forecast track brings the storm to the Golden State.
- What forecasters are keeping an eye on will be the abundant tropical moisture that could be flowing into California, Nevada and Arizona.
- The NHC says Hurricane Hilary is expected to continue to spin off to the west-northwest through Thursday night. A turn to the northwest is expected Friday morning, followed by a turn toward the north-northwest and north on Saturday.
- On this path, the center of Hurricane Hilary will approach the Baja California peninsula over the weekend, according to the NHC.

August 17, 2023

Eastern Pacific – Tropical Storm Fernanda

- On Sunday, the National Hurricane Center (NHC) upgraded Tropical Storm Fernanda in the Eastern Pacific to Hurricane Fernanda, which quickly became a major hurricane.
- Fernanda then began to weaken on Monday and Tuesday.
- Weakening continued on Wednesday, and Fernanda was downgraded to a tropical storm. The NHC says Tropical Storm Fernanda has maximum sustained winds of 40 mph and is moving to the west at 15 mph.
- According to the NHC, the tropical storm will likely become a post-tropical remnant low on Thursday and dissipate over the weekend.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
	N/A			

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
OH	Train Derailment Feb 3-8, 2023	7/3/2023	Pending	1 County
TN	Severe Storms & Straight-line winds June 25-26	7/20/2023	Pending	1 County
AK	Flooding May 10-June 3, 2023	8/1/2023	Pending	5 REAAs
PA*	Severe Storm, Straight-Line Winds & Flooding July 9, 2023	7/31/2023	Pending	1 County
WY	Flooding June 15, 2023	8/1/2023	Pending	1 County

*Award of task order to contractor pending
